

PICK-UP SWEEPER

The Pick-up sweeper takes the sand with it. When sweeping the broom moves on idlers which ensures a long life span for the guided vanes. The altitude of the floating main broom can be adjusted. Rotating speed can also be adjusted steplessly depending of the wear of the brooms. The broom diameter is 700 or 900 mm, a larger size which provides fast and efficient sweeping with longer replacement intervals. Requires 3rd and 4th hydraulic functions. Emptying the pick-up sweeper is easy thanks to the hydraulic hatch under the machine. Our largest model has a container that holds as much as a thousand litres.

- 400 mm broom on right side.
- Min. oilflow is 55 l/min.
- Hydraulic hatch for the container under the machine.

Art. No.	Working width <i>mm</i>	Brooms <i>mm</i>	Container <i>litres</i>	Weight <i>kg</i>
63130	1300	700	250	580
63160	1600	900	560	1000
63200	2000	900	700	1100
63250	2500	900	1000	1200

Art. No.	Options
60030	Wateringsystem with 255 l tank (63130 has 155 l tank)
60015	Flowregulator 120-220 l/min
8000002	Control system for electrical valve
60070	Hydraulic lifting of side broom incl. electrical valve
60035	Extra broom 400 mm for left side
